

My CD, Overexplained

To make your own free John Vosmek *01.01.01* CD is simple if you have access to a printer and a CD burner. (If you are reading this, it is most likely a given that you have internet access.) First, download all 10 mp3s and the cover art from Endsound. Next burn the tracks to a CD. Track order numbers should be included in the title of the mp3 files. You should now have two PDF files for cover art. If your printer will take card stock, use that and you will have a better CD cover, if it doesn't, no biggie. Print page (1). Now feed the same page back into your printer so that page (2) prints on the back of page (1). Now the liner notes should be printed on the back of your front cover. Well, you can probably figure out from here how to cut the thing out and which part to put where in the jewel box...
